

Note: Positions of buried facilities shown are derived from interpretations of signals for electronic devices. Reception of electronic signals is subject to interference and has limitations, therefore it should not be assumed that all buried facilities are shown, and facilities which are shown should not be construed as "located" until physically exposed. All underground installations should be marked by the respective authorities prior to excavation or construction. All labelled facilities on this map are assumptions based on header labelling, tracer wire orientation, or pipeline orientation referenced from existing documentation. Potential discrepancies may need further investigating.
